

Outdoor PIR Motion Sensor, Weather Proof, Model : HC-15

MODEL : HC 15

The PIR Motion Sensor, Model: HC-15 utilizes the infrared energy from human as control-signal source and it can start the light load at once when one enters in the detection range of the sensors & when there is no active human presence the light will be deactivated automatically. It can identify day & night automatically, it is easy to install & used widely. The product adopts good sensitivity & integrated circuit. It gathers automatism convenience, safely, saving-energy and practical functions.

Features

1. Suitable for outdoor use
2. Wide Angle of 180 degree
3. LUX & Time adjustment

Specification

Detection Range : 180°
Power Source : 220-240VAC
Power Frequency : 50Hz
Rated Load Max. : 1200W (220-240V/AC)
Detection Distance : Max.12m(<24°C)
Time Delay : 10sec±3sec to 7min±2min(adjustable)
Ambient Light : <3-2000LUX(adjustable)
Detection Motion Speed : 0.6-1.5m/s
Installation Height : 1.8-2.5m
Protection Class : IP65

Detection Pattern

Applications

1. Parking area / Terrace
2. Backyard / Garden area
3. Near Gate / Main Entrance
4. Malls / ATM / Lifts
5. Basement / Stairways
6. Balcony / Toilets
